

BASEL 3
Regulatory Liquidity Disclosures

For the Three Months Ended 30th June 2020

Liquidity Coverage Ratio (LCR) for the quarter ended 30th June 2020

Introduction

In August 2018, the Central Bank of Bahrain (CBB) issued its regulations on Liquidity Risk Management (LM). The regulations require Bahraini bank licensees to meet a minimum Liquidity Coverage Ratio (LCR) of 100% on a daily basis. The objective of the LCR is to improve resilience of banks' short-term liquidity risk profile by ensuring that they have sufficient level of high-quality liquid assets (HQLAs) to honor net cash outflows and survive a significant stress scenario lasting for a period of up to 30 days.

GFH Financial Group Liquidity Coverage Ratio

The group has reported an LCR of 118% for Q2 2020 which is lower than the reported LCR of 188% for Q4 2019.

High Quality Liquid Assets (HQLA) Portfolio

Assets qualify as HQLA if they can be easily and immediately converted into cash at little or no loss of value under stress circumstances. HQLA comprises of Level 1, Level 2A, and Level 2B liquid assets. Level 1 assets comprise of an unlimited share of the total pool and are not subject to haircuts. A 15 % haircut is applied to the current market value of each level 2A asset held in the stock of HQLA. Level 2B liquid assets, are considered less liquid and more volatile than Level 2A liquid assets.

GFH has constantly maintained a robust portfolio of High Quality Liquid Assets (HQLA) to support its liquidity position. The Group's total adjusted HQLA for the reporting period has decreased by 45% compared to Q4 2019.

Net Cash out Flow

The term total net cash outflows is defined as the total expected cash outflows minus total expected cash inflows in the specified stress scenario for the subsequent 30 calendar days. GFH calculates its outflows on the basis of total expected cash outflows of various categories or types of liabilities and off-balance sheet commitments such as Deposits repayments and Term debts by the rates at which they are expected to run off or be drawn down.

Total expected cash inflows are calculated by multiplying the outstanding balances of various categories of contractual receivables such as money market placements and other non-HQLA securities funded by the Group; by the rates at which they are expected to flow out under the scenario up to an aggregate cap of 75% on total expected inflows as % of total expected cash outflows.

Net Stable Fund Ratio (NSFR) for the quarter ended 30th June 2020

Introduction

Net Stable Funding Ratio (NSFR) is defined as the amount of available stable funding (ASF) relative to the amount of Required stable funding (RSF) This ratio should be equal to at least 100% on an ongoing basis. In August 2018, the Central Bank of Bahrain (CBB) issued the regulations to banks operating in Bahrain on the reporting of the Net Stable Funding Ratio effective 31 December 2019.

Net Stable Fund Ratio (NSFR)

The Group's NSFR stood at 88% as at 30th June 2020.

Available Stable Funding (ASF)

ASF is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to 1 year. The Group reported total capital of USD 1,009mn during as at 30th June 2020. While Total weighted ASF value was USD 3,920mn.

Required Stable Funding (RSF)

RSF is defined as the portion of assets and OBS exposures expected to be funded on an ongoing basis over a 1-year horizon. The Group's total weighted high-quality liquid assets (HQLA) was USD 23 mn. The group has also reported Weighted OBS items of USD 14mn. The total weighted RSF stood at USD 4,470mn.

No.	Item	No Specified Maturity	Less than 6 months	More than 6 months and less than one year	Over one year	Total weighted value
Available Stable Funding (ASF):						USD'000
1	Capital:					
2	Regulatory Capital	964,166	-	-	44,792	1,008,958
