GFH’s Corporate Governance Philosophy

The corporate governance framework is focused on assisting GFH to successfully meet its strategic objectives and maintain steady growth whilst remaining fully cognisant of our clients’ and shareholders’ interests.

GFH believes that compliance with corporate governance principles enhances its value through providing a suitable framework for the Board, Board Committees and Management to perform their duties in a manner that serves the interests of the bank and its shareholders. For this reason, GFH strives to achieve the highest levels of transparency and accountability by adopting and executing strategies, goals and policies which are aimed to comply with the regulatory requirements.

The Board of Directors are accountable to shareholders for the creation and delivery of strong sustainable financial performance and long-term shareholder value. To achieve this, the Board implement and monitors the Bank’s strategy and performance, within a framework of sound corporate governance. The Chairman of the Board is responsible for leading the Board, ensuring its effectiveness, monitoring the performance of the CEO and maintaining a dialogue with the bank’s stakeholders. The control functions such as Internal Audit, Risk Management and Compliance & AML report directly to the Board Audit and Risk Committee (“ARC”).

- The Board Performance Evaluation Framework is based on the following - Principles:
- The Board shall, through the Nomination, Remuneration and Governance Committee (NRGC), undertake a formal and rigorous annual evaluation of its own performance and that of its Committees and Individual Directors.
- The Chairman will act on the results of the performance evaluation by recognising the strengths and addressing the weaknesses of the Board. The Chairman of the NRGC will be responsible for the performance evaluation of the Chairman, taking into account the views of other Board Members.
- The evaluation process will be used constructively as a mechanism to improve Board effectiveness, maximise strengths and tackle weaknesses.
- The results of Board evaluation will be shared with the Board as a whole whilst the results of individual assessments will remain confidential between the Chairman and the Director concerned.
- Key results indicators, derived from the strategic plans and objectives, should be used to measure the Board's performance.

The Board Performance Evaluation Framework is based on the following - Methodology:

- 1) Each Board Member is required to complete the 'Board Performance Evaluation Form' and the "Individual Director's Self Evaluation Form".
- 2) The Chairman of the Board will also individually evaluate each of the Board Members.
- 3) NRGC will collate the ratings of the Board (Board Performance Evaluation Form) done by each of the Board Member accordingly; in order to arrive to mean results.

All connected counterparty exposures (within the CBB defined limits) will be approved by the appropriate approving authority as per the Delegate Authority Limit (DAL). Where the approving authority as per DAL is connected / interested, the approval authority shall move to the next level.

In determining whether to approve a Connected Counterparty Transaction, the requesting and approving authority will consider, among other factors, the following factors to the extent relevant to the Connected Counterparty Transaction:

- Exposures to connected counterparties may be justified only when undertaken for the clear commercial advantage of the bank, when negotiated and agreed on an arm's length basis, and when included in the policy statement agreed with the Central Bank.
- No Islamic facilities provided by a bank to its own external auditors shall be permitted (External auditors include firm/ partnership, the partners, the directors and managers of the audit firm). In addition, unless provided for in the contract, off-balance sheet restricted investment accounts will not be permitted to participate in on-balance sheet corporate funding and vice versa and movement within restricted investment accounts is not permitted unless specifically permitted under a valid contract between the bank and the relevant client.
- Whether the terms of the Connected Counterparty Transaction are fair to the Bank and on the same basis as would apply if the transaction did not involve a Connected Counterparty;
- Whether there are business reasons for the Bank to enter into the Connected Counterparty Transaction;
- Whether the Connected Counterparty Transaction would impair the independence of an outside director and;
- Whether the Connected Counterparty Transaction would present an improper conflict of interests for any director or executive officer of the Bank, taking into account the size of the transaction, the overall financial position of the director, executive officer or Connected Counter Party, the direct or indirect nature of the director's, executive officer's or Connected Party's interest in the transaction and the ongoing nature of any proposed relationship, and any other factors the ARC deems relevant.
- The bank must not undertake exposures to controllers as defined under Chapter GR-5 or to subsidiaries of such, however, smaller shareholders will be subject to normal exposure limits outlined under CM-4.4.5. Directors who are also controllers (or the appointed board representatives of such controllers) are subject to a 0% limit.
- The Central Bank's prior written consent should be obtained for any credit facilities provided to an employee where the amount of such facility, either singly or when added to an existing facility/existing facilities outstanding to that employee at that date, would be equal to or in excess of BD 100,000 (Bahrain Dinars One Hundred Thousand), or its equivalent in foreign currency. Banks must notify the Central Bank in writing of any senior employee who fails to discharge his repayment obligations.
- Reciprocal cross-holdings of capital between a bank and its "controllers", which artificially inflate the capital of licensee concerned, are not permitted. Any cross-holdings that occur due to acquisitions or takeovers must be deducted from the concerned bank's capital. Any member of the Board who has an interest in the transaction under discussion will abstain from voting on the approval of the Connected Counterparty Transaction.

E.14. Employment of Relatives

The Group maintains Employment of Relatives policy to prevent any potential for favoritism and conflict of interest in decision-making due to factors of kinship in relationships among employees within the Group regardless of difference in department and reporting line. The Group does not permit the employment of relatives (direct family of the employee up to fourth degree and up to the second degree for the employee's spouse) of current Employees. This restriction is not limited to the recruitment and selection only but is also applicable on existing employee of the group in case he/she marries another employee of the group.

All Departmental Head are required to promptly report to Head of Human Resource any changes in status of their respective team-members. Also, all employees are urged, if in doubt, to consult with their respective supervisors and the Human Resource department.

E.15. Remuneration strategy

It is GFH's basic compensation philosophy to provide a competitive level of total compensation to attract and retain qualified and competent employees. GFH's variable remuneration policy will be driven primarily by a performance-based culture that aligns employee interests with those of the shareholders of GFH. The variable remuneration policy helps ensure effective alignment of remuneration with prudent risk-taking by senior management in the conduct of business.

A robust and effective governance framework ensures that GFH operates within clear parameters of its compensation strategy and policy. All compensation matters, and overall compliance with regulatory requirements, are overseen by the CEO and the Nomination and Remuneration Committee of the Board (NRGC).

The quality and long-term commitment of all our employees is fundamental to our success. We therefore aim to attract, retain and motivate the very best people who are committed to maintaining a career with GFH, and who will perform their role in the long-term interests of our shareholders. GFH's reward package is comprised of the following key elements:

1. Fixed pay;
2. Benefits;
3. Annual performance bonus;
4. Commission for sales staff;
5. Co-investment plans;
6. Remuneration for senior management from participation in boards of investee entities; and
7. The long-term performance incentive plan

GFH's remuneration policy in particular, considers the role of each employee and has set guidance on whether an employee is a Material Risk Taker and/or an Approved Person in a business line, control or support function. An Approved Person is an employee whose appointment requires prior regulatory approval because of the significance of the role within GFH and an employee is considered a Material Risk Taker if they are the Head of a significant business line or any individuals within their control who has a material impact on GFH's risk profile.

In order to ensure alignment between what we pay our people and our business strategy, we assess individual performance against annual and long-term financial and non-financial objectives summarised in our performance management system. This assessment also takes into account adherence to GFH's values, risks and compliance measures and above all integrity. Altogether, performance is therefore judged not only on what is achieved over the short and long-term but also importantly on how it is achieved, as the NRCG believes the latter contributes to the long-term sustainability of the business.

NRGC role and focus

The NRCG has oversight of all reward policies for GFH's employees. The NRCG is the supervisory and governing body for compensation policy, practices and plans. It is responsible for determining, reviewing and proposing variable remuneration policy for approval by the Board. It is responsible for setting the principles and governance framework for all compensation decisions. The NRCG ensures that all persons must be remunerated fairly and responsibly. The remuneration policy is reviewed on a periodic basis to reflect changes in market practices, compliance with regulations, the business plan, long term objectives and risk profile of GFH.

The responsibilities of the NRCG with regards to GFH's variable remuneration policy, as stated in its mandate, include but are not limited to, the following:-

- Review, monitor and approve the remuneration policies for the approved persons and material risk-takers, which must be consistent with GFH's corporate values and strategy to ensure that they operate as intended.
- a) The committee should be responsible for retaining and overseeing outside consultants or firms for the purpose of reviewing the remuneration of approved persons and material risk-takers, administering remuneration plans, or related matters.
- b) Ensure that the remuneration of approved persons and material risk-takers is sufficient enough to attract and retain persons of the quality needed to run GFH successfully, but that bank avoids paying more than is necessary for that purpose.
- c) Approve the individual remuneration amounts, packages and total compensation for each approved person and material risk-taker and make recommendations to the Board of the total variable remuneration (bonus pool) to be distributed, taking account the total remuneration, including salaries, fees, expenses, bonuses and other employee benefits.
- d) Evaluate the performance of approved persons and material risk-takers in light of GFH's corporate goals, agreed strategy, objectives and business plans.
- e) The committee shall be responsible to the Board for the overview of any employee benefit trust (EBT) or similar arrangements adopted for the purpose of administering the deferred incentive arrangements (including share schemes) of GFH.
- f) Ensure that variable remuneration for material risk-takers forms a substantial part of the total remuneration of approved persons and material risk-takers (other than the risk management, internal audit, operations, financial controls, internal Shari'a review/audit, AML and compliance functions personnel).
- g) Ensure that for approved persons in risk management, internal audit, operations, financial controls, internal Shari'a review/audit, AML and compliance functions the mix of fixed and variable remuneration is weighted in favour of fixed remuneration.
- h) Ensure that the system includes effective controls including stress testing and back testing results of the remuneration policy and that the system's practical operation is regularly reviewed for compliance with regulations, internal policies and bank procedures.
- i) Review remuneration outcomes, risk measurements and risk outcomes regularly for consistency with the Board's approved risk appetite, for submission for the Board for its review.
- j) Review cases where any ex-ante risk adjustments are to be used to take into account severe but plausible scenarios to the variable remuneration as per GFH's variable remuneration policy.
- k) Review cases where the bonus is diminished by exercise of Malus and Clawback adjustments.

- l) Question payouts for income that cannot be realised or whose likelihood of realisation remains uncertain at the time of payout.
- m) Ensure appropriate compliance mechanisms are in place to ensure that employees commit themselves to not using personal hedging strategies or remuneration-and liability-related insurance to undermine the risk alignment affects embedded in their remuneration arrangements.

Use of consultants:

GFH engaged external consultants to benchmark pay and grading structure to bring it in line with market practices. A consultant was also engaged to develop and update the framework for issuances of Long Term Incentive Plan (LTIP) which has been discussed and approved by the Board's NRCG committee and the Board of Directors.

Scope of application of the remuneration policy

The principles of this remuneration policy apply on a group-wide basis. However, application of deferral requirements and issue of non-cash instruments for each subsidiary of GFH will be determined by applicable local regulations and market norms. Currently, deferral arrangements are applicable only to Bahrain domiciled banking entities within the Group.

Board remuneration

GFH will determine board remuneration in line with the provisions of Article 188 of the Commercial Companies Law, 2001. The Board of Directors' remuneration will be capped so that variable remuneration in any financial year (sitting fees is not part of variable remuneration) does not exceed 10% of GFH's net profit, after all required deductions outlined in Article 188 have been made. Remuneration of non-executive directors will not include performance-related elements such as grants of shares, share options or other deferred stock-related incentive schemes, bonuses or pension benefits. Board remuneration is subject to approval of the shareholders in the annual general meeting.

Variable remuneration for staff

Variable remuneration is performance related and consists primarily of the annual performance bonus award. As part of our staff's variable remuneration, the annual bonus rewards delivery of operational and financial targets set each year, the individual performance of the employees in achieving those targets, and their contribution to delivering GFH's strategic objectives.

GFH has adopted a Board approved framework to develop a transparent link between variable remuneration and performance. The framework is designed on the basis of meeting both satisfactory financial performance targets and the achievement of other non-financial factors, that will, all other things being equal, deliver a target bonus pool for employees, prior to consideration of any allocation to business lines and employees individually. In the framework adopted for determining the variable remuneration pool, the NRCG aims to balance the distribution of GFH's profits between shareholders and employees.

Key performance metrics at GFH level include a combination of short-term and long-term measures and include profitability, solvency, liquidity, risk diversification, strategy implementation and growth indicators. The performance management process ensures that all goals are appropriately cascaded down to respective business units and employees.

In determining the quantum of variable remuneration, GFH has implemented a hybrid model by defining a Top Down (profit based) bonus pool funding for its staff. The total bonus pool is capped at a percentage of profit before being assessed for risk. This approach is a starting position and the NRCG may choose to implement a discretionary award for a given year based on affordability for GFH and its assessment of GFH's current and future resource requirements. The bonus pool is adjusted to take account of risk via the use of risk-adjusted measures (including forward-looking considerations), subject to the final discretion of the NRCG. In addition to the annual bonus plan, the Board from time-to-time approves LTIP awards with performance and service conditions to retain key management and incentive achievement of long term performance and strategic measures. These awards vest ratably on an annual basis and can be accelerated or cancelled based on the extent of achievement of targets set for each year.

Under the variable remuneration policy of GFH, placement fees, sales commission or incentives for sales staff is not considered to be part of the variable remuneration (subject to deferral) as it is an integral part of the overall pay structure of the sales and placement staff. Further, these payments are not considered variable remuneration as they are not directly or indirectly linked to GFH-wide performance and are considered activity-based payments.

The NRGC carefully evaluates practices by which remuneration is paid for potential future revenues whose timing and likelihood remain uncertain. NRGC demonstrates that its decisions are consistent with an assessment of GFH's financial condition and future prospects. A special pool is also considered for recoveries made against any legacy investments and legal cases and is approved on a case-by-case basis by the Board of Directors.

GFH uses a formalised and transparent process to adjust the bonus pool for quality of earnings. If the quality of earnings is not strong, the profit base could be adjusted based on the discretion of the NRGC.

For the overall Bank to have any funding for distribution of a bonus pool, threshold financial targets have to be achieved. The performance measures ensure that total variable remuneration is generally, considerably contracted where subdued or negative financial performance of GFH occurs. Furthermore, the target bonus pool as determined above is subject to risk adjustments in line with the risk assessment and linkage framework.

Remuneration of control and support functions

The remuneration level of staff in the control and support functions allows GFH to employ qualified and experienced personnel in these functions. GFH ensures that the mix of fixed and variable remuneration for control and support function personnel is weighted in favor of fixed remuneration. In exceptional cases, the approval of the NRGC shall be obtained. The variable remuneration of control functions is to be based on function-specific objectives and is not determined by the financial performance of the business areas they monitor to avoid conflict of interests related to the business unit they are overseeing.

GFH's performance management system plays a major role in deciding the performance of the support and control units on the basis of the objectives set for them. Such objectives are more focused on non-financial targets that include risk, control, compliance and ethical considerations as well as the market and regulatory environment apart from value adding tasks which are specific to each unit.

Variable compensation for business units

The variable remuneration of the business units is primarily determined by key performance objectives set through the performance management system of GFH. Such objectives contain financial and non-financial targets, including risk control, compliance and ethical considerations as well as market and regulatory requirements. The consideration of risk assessments in the performance evaluation of individuals ensures that any two employees who generate the same short-run profits but take different amounts of risk on behalf of GFH are treated differently by the remuneration system.

Risk assessment framework

The purpose of risk linkages to the reward framework is to align variable remuneration to the risk profile of GFH. In its endeavor to do so, GFH considers both quantitative measures and qualitative measures in the risk assessment process. Both quantitative measures and human judgment play a role in determining any risk adjustments. The risk assessment process encompasses the need to ensure that the remuneration policy as designed reduces employees' incentives to take excessive and undue risks, is symmetrical with risk outcomes and delivers an appropriate mix of remuneration that is risk aligned.

GFH's NRGC considers whether the variable remuneration policy is in line with GFH's risk profile and ensures that through GFH's ex-ante and ex-post risk assessment framework and processes, remuneration practices where potential future revenues whose timing and likelihood remain uncertain are carefully evaluated.

Risk adjustments take into account for all types of risk, including intangible and other risks such as reputation risk, liquidity risk, the cost of capital and the strategic measures. GFH undertakes risk assessments to review financial and operational performance against business strategy and risk performance prior to distribution of the annual bonus. GFH ensures that total variable remuneration does not limit its ability to strengthen its capital base.

The bonus pool takes into account the performance of GFH which is considered within the context of GFH's risk management framework. This ensures that the variable pay pool is shaped by risk considerations and Bank-wide notable events. The size of the variable remuneration pool and its allocation within GFH takes into account the full range of current and potential risks, including:

- a) The cost and quantity of capital required to support the risks taken;
- b) The cost and quantity of the liquidity risk assumed in the conduct of business; and
- c) Consistency with the timing and likelihood of potential future revenues incorporated into current earnings.

The NRCG keeps itself abreast of GFH's performance against the risk management framework. The NRCG will use this information when considering remuneration to ensure returns, risks and remuneration are aligned. Since 2021 has been an unusual year effected by the global pandemic and consequential market impact, the NRCG has adopted a more qualitative approach in their assessment of performance and rewards.

Risk adjustments

GFH has an ex-post risk assessment framework which is a qualitative assessment to back-test actual performance against prior risk assumptions.

In years where GFH suffers material losses in its financial performance, the risk adjustment framework will consider the following:

- Need for a considerable contraction of GFH's total variable remuneration.
- At an individual level, poor performance by GFH will mean individual KPIs are not met and hence employee performance ratings may be lower
- Reduction in the distribution of amounts previously earned, through increased deferred compensation, which may be paid once GFH's performance improves
- Reduction in the value of deferred shares or awards
- Possible changes in vesting periods and additional deferral applied to unvested rewards
- Lastly, if the qualitative and quantitative impact of a loss incident is considered significant, a malus or clawback of previous variable awards may be considered.

The NRCG, with the Board's approval, can rationalise and make the following discretionary decisions:

- Take no action
- Increase/reduce the ex-ante adjustment
- Consider additional deferrals or increase in the quantum of non-cash awards
- Recovery through malus and clawback arrangements

Malus and Clawback framework

GFH's malus and clawback provisions allow GFH's Board of Directors to determine that, if appropriate, unvested elements under the deferred bonus plan can be forfeited/ adjusted or the delivered variable remuneration recovered in certain situations. The intention is to allow GFH to respond appropriately if the performance factors on which reward decisions were based turn out not to reflect the corresponding performance in the longer term. All deferred compensation awards contain provisions that enable GFH to reduce or cancel the awards of employees whose individual behavior has had a materially detrimental impact on GFH during the concerned performance year.

Any decision to take back an individual's awards can only be taken by GFH's NRCG. GFH's NRCG takes into account the advice of the CEO, Risk, Finance and HR Departments as appropriate.

GFH's malus and clawback provisions allow GFH's Board to determine that, if appropriate, vested/unvested elements under the deferred bonus plan can be adjusted/cancelled in certain situations. These events include, but not limited to, the following:

- Reasonable evidence of misbehavior or material error by the employee causing harm to GFH's reputation or where his/her/their actions have amounted to misconduct, incompetence or negligence
- The employee's business unit suffers a material downturn in its financial performance or a material restatement of the financial statements of GFH
- The employee's business unit suffers a material risk management failure
- An employee deliberately misled the market and/or shareholders in relation to the financial performance of GFH
- A significant deterioration in the financial health of GFH

Clawback can be used if the malus adjustment on the unvested portion is insufficient given the nature and magnitude of the issue.

Macro-economic impacts (such as COVID-19 related disruptions) that are specific or idiosyncratic to GFH are not considered as basis for malus or clawback.

Components of Variable remuneration

GFH's variable remuneration framework provides for the following key components:

Upfront cash	The portion of the variable compensation that is awarded and paid out in cash on conclusion of the performance evaluation process for each year.
Deferred Cash	The portion of variable compensation that is awarded and paid in cash on a pro-rata basis over a period of minimum three years.
Upfront share awards	The portion of variable compensation that is awarded and issued in the form of shares on conclusion of the performance evaluation process for each year, but released after a retention period of six months.
Deferred annual bonus (DAB) share awards	The portion of variable compensation that is awarded and paid in the form of shares on a pro-rata basis over a period of minimum three years and an additional retention period of six months once vested. DAB shares are not subject to any additional performance conditions.
Future performance awards (FPA)	<p>The portion of variable compensation which is awarded to selected employees for future performance conditions. The awards are contingent on the delivery of set performance targets for GFH as well as service conditions on part of employees. These awards comprise individually or a combination of the following:</p> <p>Long-term Incentive Plan (LTIP) Shares, where the employees are compensated in form of shares as a percentage on achievement of some pre-determined performance conditions</p> <p>Profit share, where the employees are compensated based on a specified percentage of targeted profit for a transaction, distributable on achievement of targeted return.</p> <p>Carried Interest, where the employees are compensated a specified percentage of fair value gain on investments once it achieves a specified hurdle rate on realisation.</p> <p>Co-investment, wherein as portion of variable remuneration is awarded in the form of an investment made by GFH which is encashable by employee on Bank's exit from the investment.</p> <p>Sales/recovery incentive, where the employee or a team is compensated on the basis of a specified percentage of a sales value of an investment on successful exit or recovery of an asset.</p>

Employee Share Ownership Loan Scheme

GFH may also implement an employee share ownership loan scheme (ESOL Scheme) from time to time to be implemented under any of the Share Incentive Scheme it develops. Such ESOL Scheme, if implemented, shall allow employees to increase their participation in GFH Shares through the utilisation of financing advanced by GFH and the right to acquire GFH shares at the pricing determined in accordance with the applicable ESOL Scheme. The ESOL Scheme is designed to enable eligible participants to increase their holdings of GFH shares on favourable terms but under the funding of the participants themselves. The existing LTIP plans includes embedded leverage options.

Establishment of the Trust Instrument

GFH has established a GFH Employee Benefit Trust instrument to hold and manage its deferred staff benefits related to the Variable Remuneration policy. The Trustees shall undertake all of the duties set out in the Bahrain Trust Law and the Trust Instrument.

Deferred compensation

All approved persons and material risk-takers earning over BHD 100,000 in total compensation are subject to deferral of variable remuneration as follows:

Element of variable remuneration	CEO, his deputies and other 5 most highly paid business line employees	Other covered staff	Deferral period	Retention	Malus	Clawback
Upfront cash	40%	50%	immediate	-	-	Yes
Upfront shares	-	0%-10%	immediate	6 months	Yes	Yes
Deferred cash	0%-10%	-	Over 3 years	-	Yes	Yes
Deferred share awards	0%-50%	0%-50%	Over 3 years	6 months	Yes	Yes
Other Non-Cash Awards or FPA	0%-60%	0%-50%	Performance linked	6 months	Yes	Yes

The NRCG, based on its assessment of role profile and risk taken by an employee could increase the coverage of employees that will be subject to deferral arrangements. For the purpose of calculation of benefits, the value of employee benefit on date of the issuance of the award (and to be recognized in the P&L) is considered for the purposes of calculation of total variable compensation and all other measures under the variable remuneration policy.

All deferred and future performance awards are subject to malus provisions. All share awards and related dividends are released to the benefit of the employee after a six-month retention period from the date of vesting. The number of equity share awards is linked to GFH's share price as per the rules of GFH's Share Incentive Scheme.
